

Bridging the gap

SMA Knowledge Exchange

INVITATION: 28 May 2021

Roche is pleased to invite you to the next webinar in our Continuing Medical Education series in Spinal Muscular Atrophy. The next session will take place on 28 May and will focus on respiratory care for patients with SMA. This CME will provide an opportunity to gain knowledge from a Clinical Professor in Paediatric Respiratory Medicine and a Senior Respiratory Therapist.

Agenda

Time	Topic
15:00	Welcome
15:05	Focus on Medical Considerations with Prof Dominic Fitzgerald
15:35	Focus on Respiratory Therapy with Mr Michael Doumit
16:05	Questions and Answers
17:30	Close

**All times are Hong Kong time

Zoom Webinar ID: 844 0254 0069

**Please join the journey to co-create a better environment
for patients and families living with SMA.**

Prof Dominic Fitzgerald **MBBS PhD FRACP**

Professor Dominic Fitzgerald is a paediatric respiratory and sleep physician at The Children's Hospital at Westmead in Sydney. He has clinical and research interests in the evolution of lung disease in children born prematurely, asthma, cystic fibrosis and sleep medicine. A key area of focus for his work is the education of medical students, trainees in paediatrics and respiratory medicine, general practitioners and fellow practitioners. Professor Fitzgerald has been the Editor in Chief of Paediatric Respiratory Reviews since 2010.

He has also published two books: Better Health for our Children – a guide for parents (Clareville Press, 2010) and The Cystic Fibrosis Passport – A guide to the needs of young children with cystic fibrosis.

Mr Michael Doumit **Bachelor of Applied Science** **(Physiotherapy) First Class Honours**

Michael Doumit is a senior physiotherapist at Sydney's Children's Hospital (Randwick) responsible for the assessment and management of children with chronic respiratory diseases and neuromuscular disorders. He is also a Lecturer in Physiotherapy in the Faculty of Medicine at Macquarie University. With nearly two decades of experience, Michael has made a significant contribution to the medical community through his research and subsequent publications on cystic fibrosis and spinal muscular atrophy. He is a sought-after speaker and has been invited to conferences around the world to share his expertise from both a clinical and research perspective.
